

Opera Browser Set Up For Slow Connections

What We Will Cover

- Blank page for home page
- Ad Blocking Extension
- Cache Size Adjustment
- Image Adjustments
- Disable Automatic Updates
- Use Opera Turbo

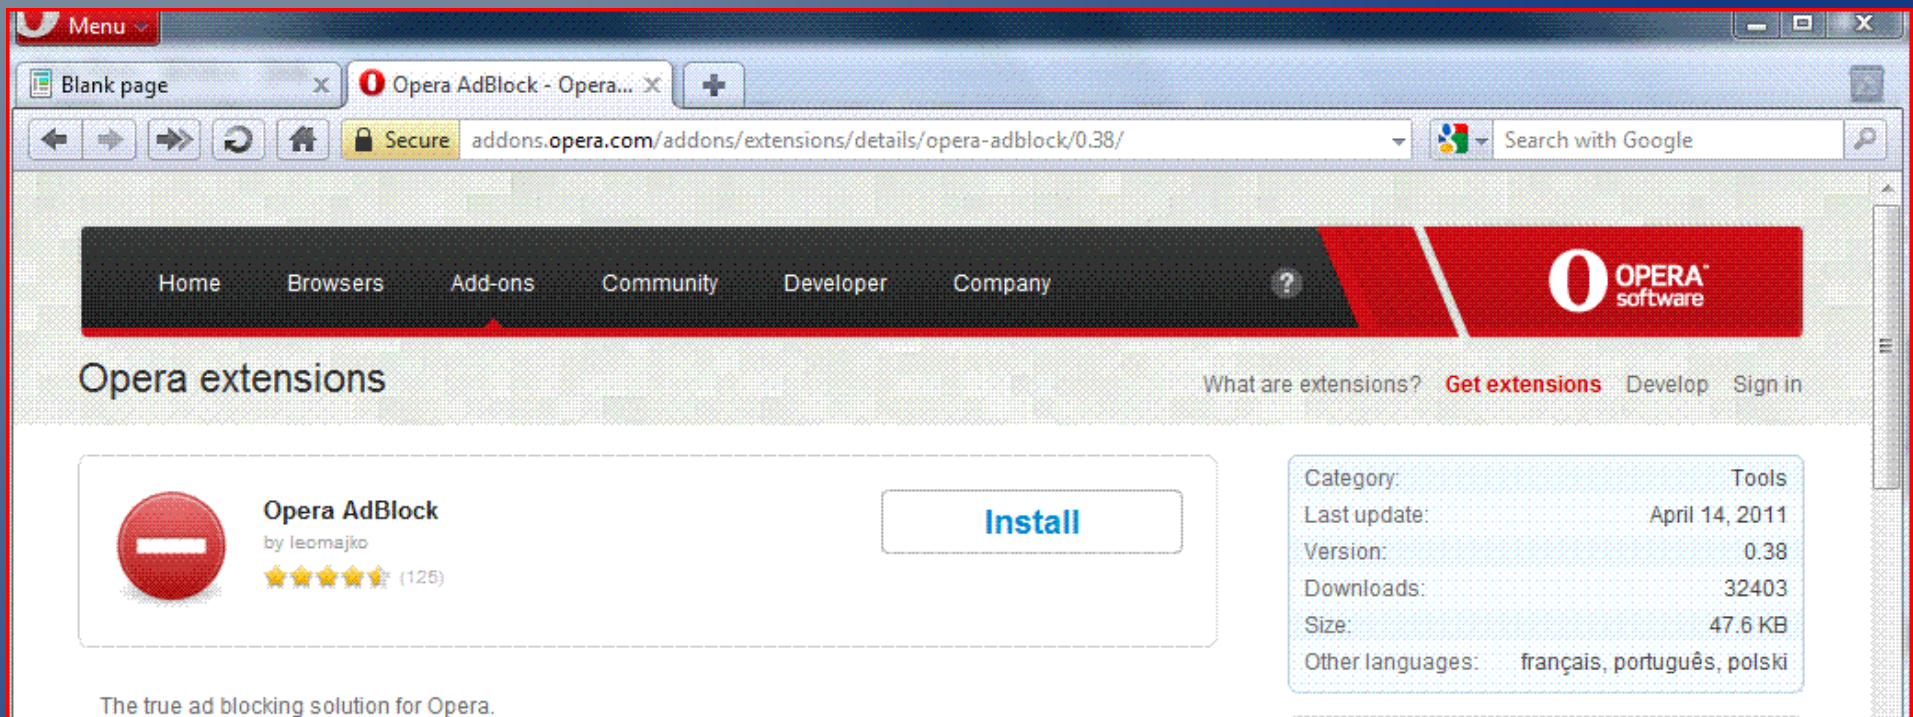

Using Blank Page as Home Page

The image shows a screenshot of the Opera browser's settings window, specifically the 'Webpages' tab. The window has a red border. At the top, there are several tabs: 'General', 'Forms', 'Search', 'Webpages', and 'Advanced'. Below the tabs, the text reads: 'Opera can start with your favorite webpages or continue from last time'. There are two settings listed: 'Startup' and 'Home page'. The 'Startup' setting is a dropdown menu with 'Continue from last time' selected, indicated by a small downward arrow. The 'Home page' setting is a text input field containing the URL 'http://redir.opera.com/portal/home/'.

Setting	Value
Startup	Continue from last time
Home page	http://redir.opera.com/portal/home/

AdBlocker

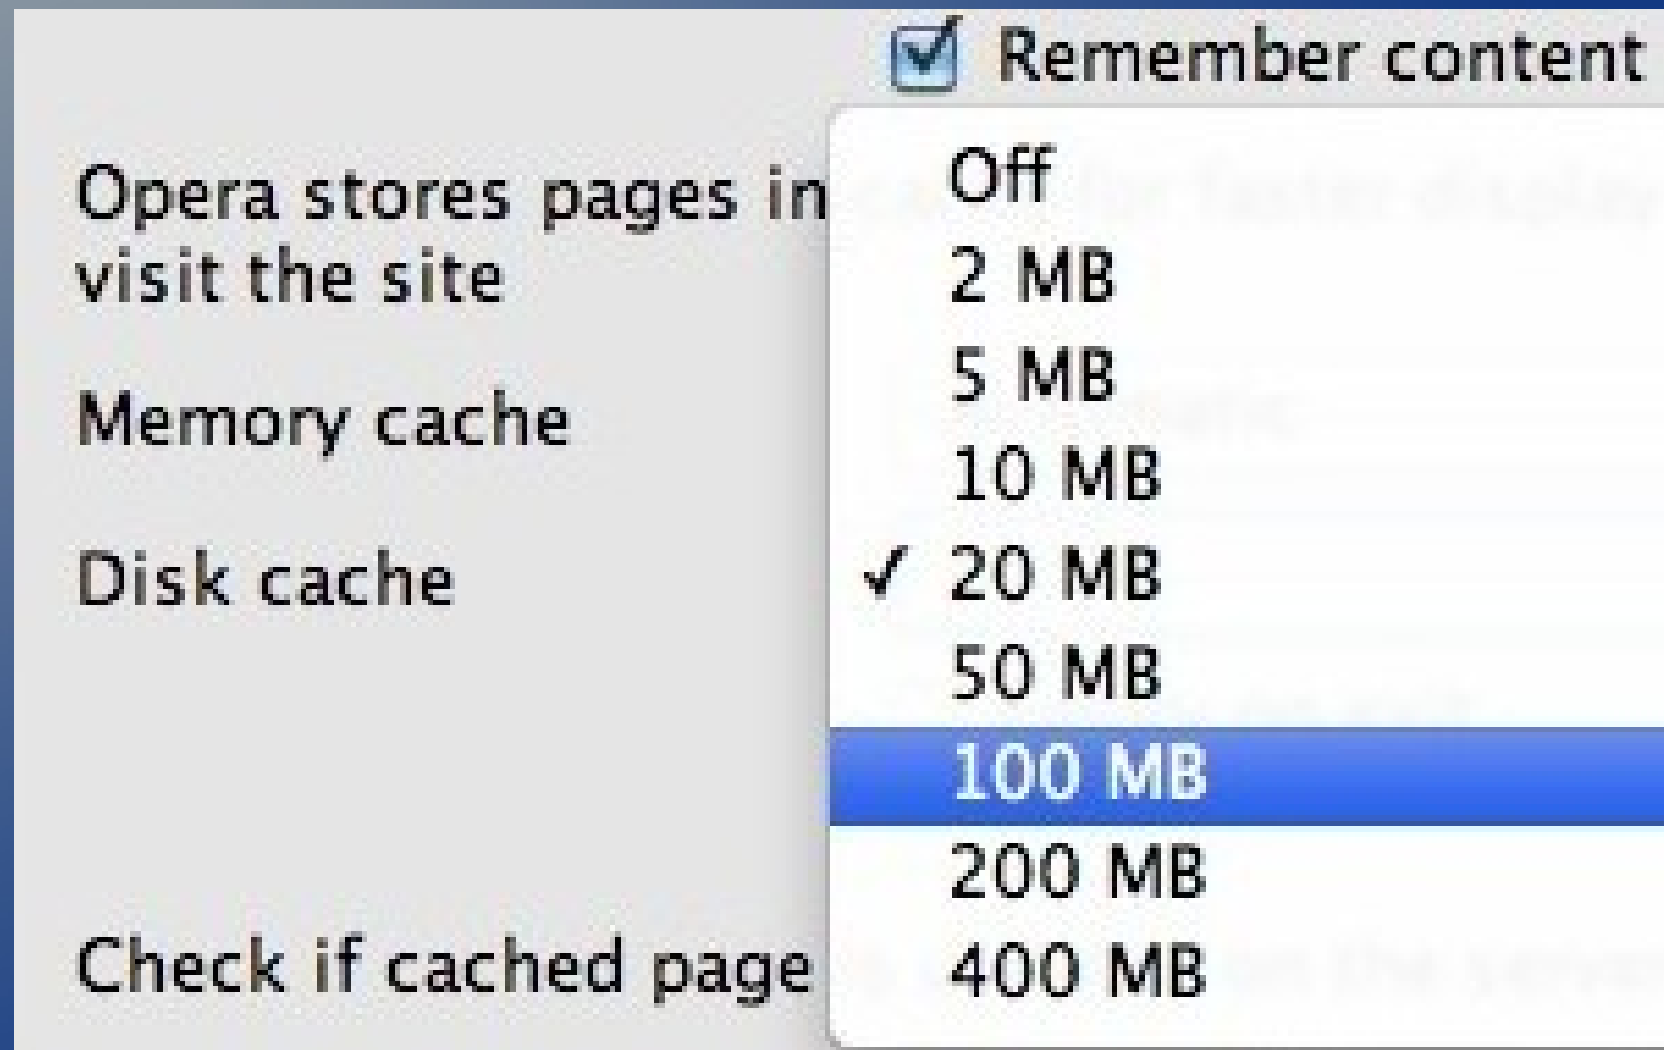

The screenshot shows the Opera Add-ons website for the Opera AdBlock extension. The browser's address bar displays the URL `addons.opera.com/addons/extensions/details/opera-adblock/0.38/`. The page features a navigation menu with links for Home, Browsers, Add-ons, Community, Developer, and Company. The Opera logo and "OPERA software" are visible in the top right. The main content area is titled "Opera extensions" and includes a search bar and links for "What are extensions?", "Get extensions", "Develop", and "Sign in". The extension details for "Opera AdBlock" by leomajko are shown, including a red prohibition sign icon, a 5-star rating with 125 reviews, and a blue "Install" button. A technical specifications table is located on the right side of the page.

The true ad blocking solution for Opera.

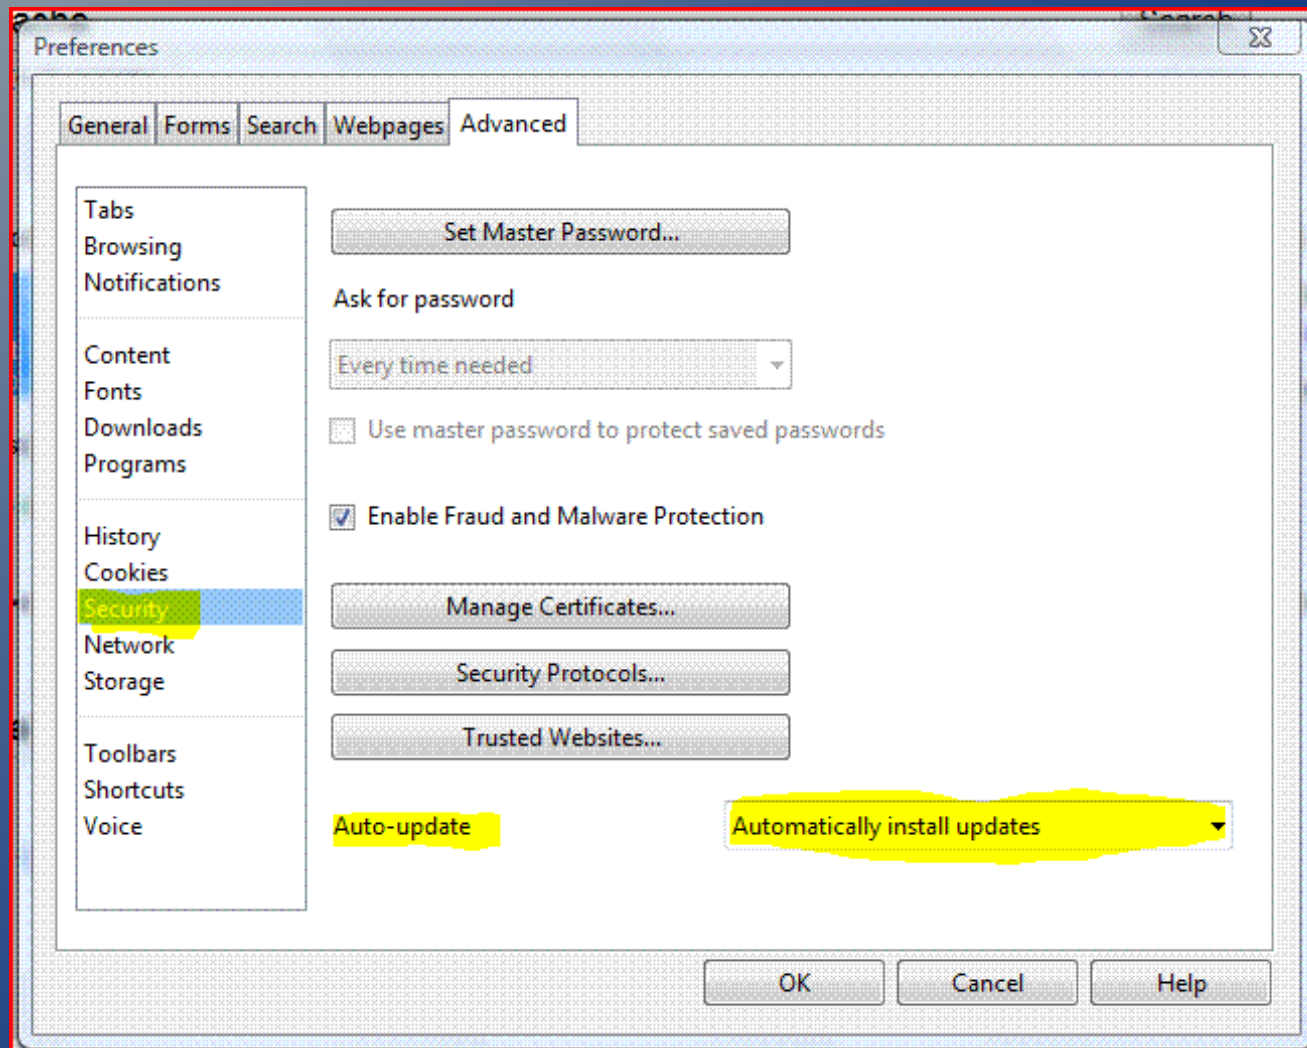

Cache Size Adjustment

Cache Size Adjustment

Disable Auto Updates

Opera Turbo

When Opera Turbo is enabled, webpages are compressed via Opera's servers so that they use much less data than the originals. This means that there is less to download, so you can see your webpages more quickly.

- Enabling Opera Turbo is as simple as clicking the Opera Turbo icon at the bottom-left of the Opera browser window. When you are on a fast connection again and Opera Turbo is not needed, the Opera browser will automatically disable it.
